

LANCOM Mission Statement

November 2017

Mission

We deliver the trustworthy foundation
for networking and digitalization.

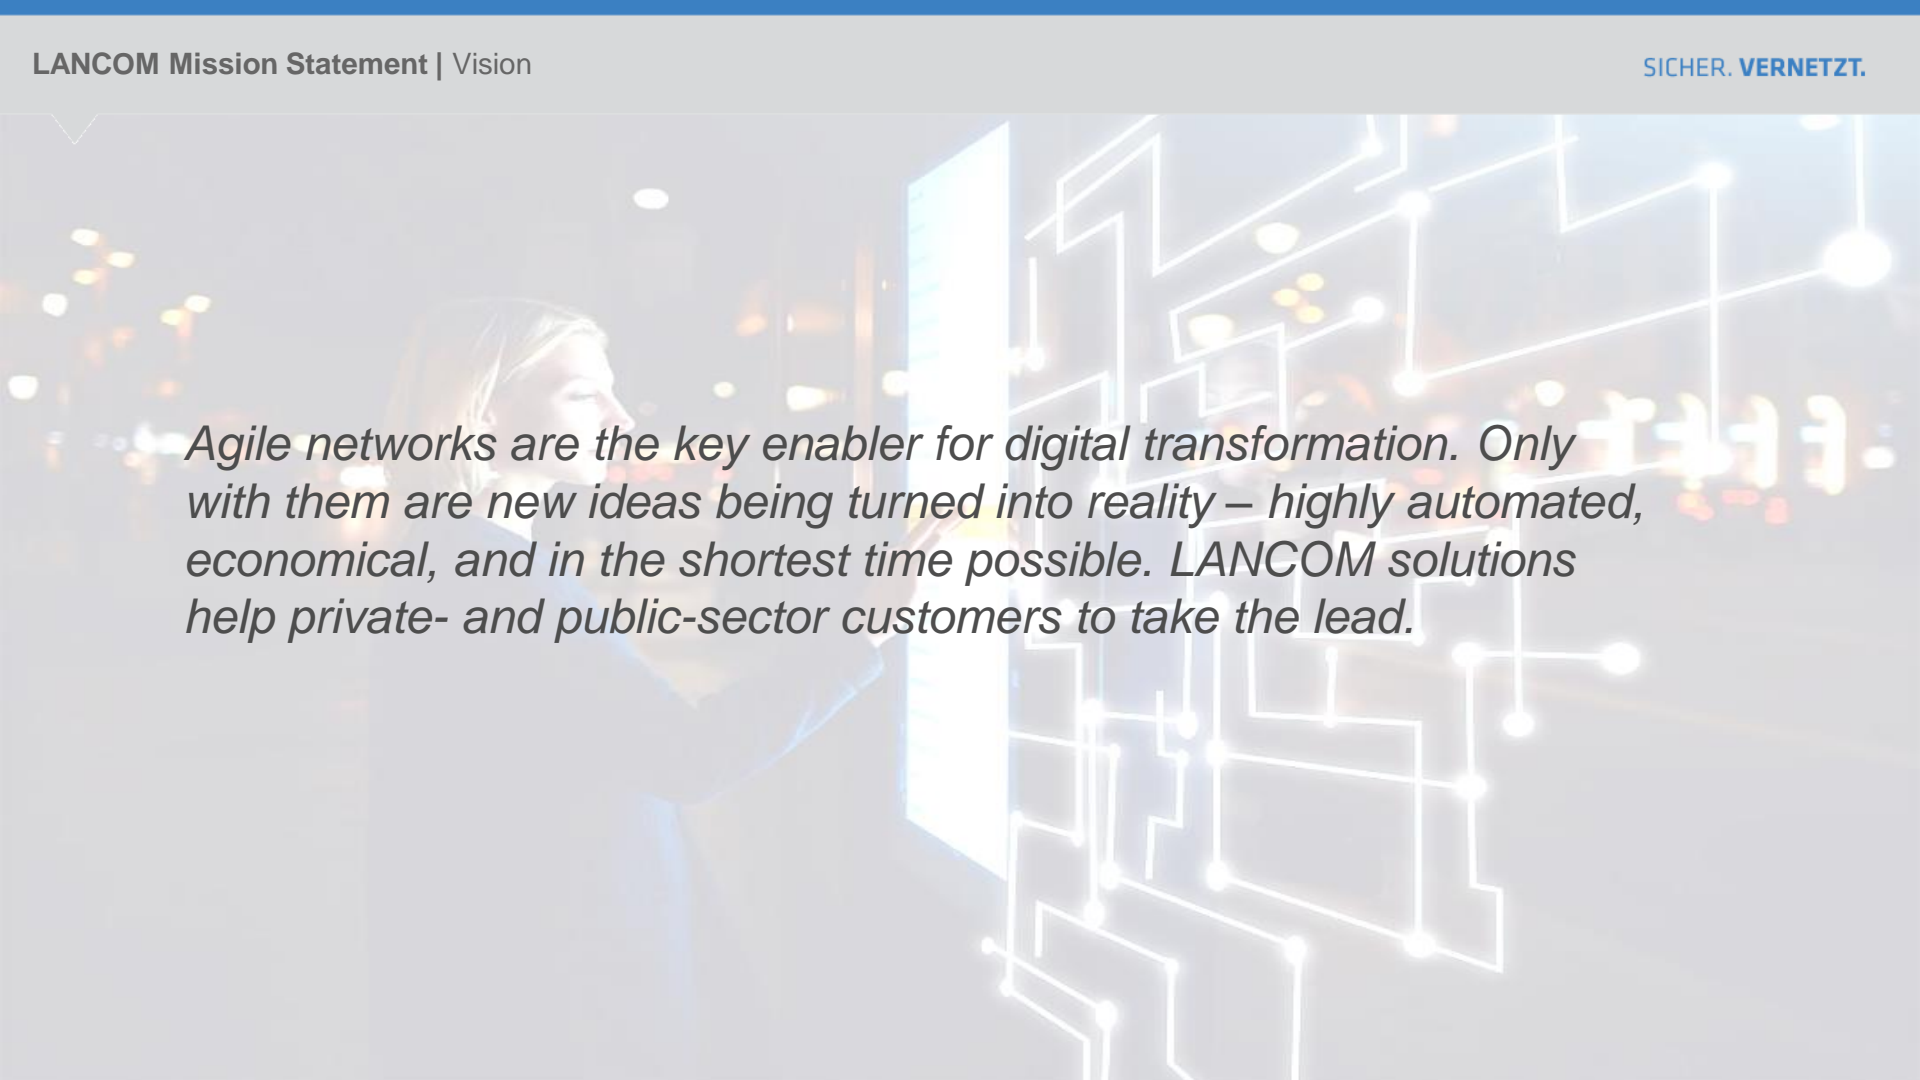

Trustworthiness is our guiding principle. Our future-proof networking solutions “Made in Germany” offer companies and institutions of all sizes a secure and reliable foundation for networking and digitalization.

Vision

Our agile networks are the key enabler for digital transformation.

Agile networks are the key enabler for digital transformation. Only with them are new ideas being turned into reality – highly automated, economical, and in the shortest time possible. LANCOM solutions help private- and public-sector customers to take the lead.

Values

We act with respect and in a sustainable manner, paying highest attention to security, reliability and future-viability.

Respectful Conduct

Acknowledging the achievements of each individual, seeing ourselves as a team, treating our customers and partners as equals: Acting with respect is the basis for our daily work.

Security

The security of our solutions is our top priority. Right from the development to the implementation of our customer networks, we strive to meet the highest standards for data protection and data security. Our products are guaranteed backdoor-free.

Reliability

Our products and solutions are extremely reliable and of the highest quality. LANCOM's strategy, values and management are characterized by a high degree of continuity. We keep our promises, and we resolve issues as quickly as possible.

Sustainability

We act sustainably and take responsibility for our partners, customers, employees, the environment, and society. Our solutions are engineered for a long life.
