## 1. Preface

The LANCOM Large Scale Monitor monitors the operation of LANCOM products. Designed especially for the LANCOM Systems WLAN access points, WLAN controllers, routers and switches, it is ideal for monitoring mid-sized to large-scale installations.

This document describes the innovations within LSM version 1.01 RU1 as well as the modifications since version 1.00.

## 2. New Features, Improvements and History

### LSM improvements 1.00.0913 Rel ► 1.01.130731 RU1

#### Bugfixes / Improvements:

##### LSM:

- Performance optimization in management and display of the WLAN station history
- LANCOM GS-23xx series switches are identified correctly at inventory
- Messages concerning license exceedance and role configuration are displayed completely in the predefined language
- Deleted or moved devices and folders are displayed accurately in the map view
- Scalable map view
- Notifications can be configured more flexible
